Signatekma was established in partnership with a French group and today operates a modern 10,000 m<sup>2</sup> production facility, positioning itself as one of the largest and most innovative road marking product manufacturers in Türkiye.

From the very first day of its establishment, Signatekma has aimed to go beyond being just a manufacturer, with the objective of becoming a technology-driven brand focused on road safety. Thanks to its sustainable infrastructure, strong commitment to environmental responsibility, team of specialized engineers, advanced laboratory facilities and continuously evolving product portfolio, the company delivers industry-leading solutions.

All products in Signatekma's portfolio are developed in accordance with internationally recognized standards such as **EN 1871**, **EN 1436**, **BS 3262**, **AASHTO M249**, **FED TTP 1952** and are formulated to provide high visibility, long durability and compliance with environmental regulations. In addition, Signatekma's airport marking paint solutions are developed in line with **ICAO ANNEX 14** requirements, ensuring full compliance with international aviation safety standards. With an environmentally friendly production approach based on zero waste, recyclable packaging and sustainable processes, Signatekma has established itself as a pioneer through numerous innovations within the industry.

**Signatekma's large portfolio includes:**

- Solvent-based road marking paints (free of aromatic solvents)
- Water-based road marking paints (odorless water based)
- Two-component road marking paints
- Three-component road marking paints
- Thermoplastic road marking paints
- Paints for tennis courts, grass fields, and bicycle lanes
- Floor coating paints
- Epoxy floor paints
- Epoxy application paints
- Glass beads, thinners, and hardeners

Founded in 1997 in Izmir, Altekma is a leading industrial company specialized in surface preparation and coating technologies, combining a strong engineering infrastructure with extensive manufacturing experience.

Its product portfolio includes road marking machines, sandblasting tanks, surface roughening (texturing) machines, water jet systems, road marking trucks, and related spare parts. Each solution is developed with a strong focus on durability, efficiency, and high performance.

Altekma prioritizes sustainable growth, customer satisfaction, and continuous innovation. Thanks to the ongoing expansion of its facilities and its dynamic R&D activities, the company consistently raises industry standards.

**Altekma's wide product range includes:**

- Airless cold road marking machines
- Airport pavement marking machines
- Thermoplastic road marking machines
- Two-component road marking machines
- Truck-mounted road marking machines
